MINES AND MINING STOCKS.

FINANCIAL AND COMMERCIAL.

U. S. COMPANY GOES TO MEXICO

Is Seeking Footbold in American Smelter Stronghold.

UTAH-APEX GETS PETRO

PENDING OPTION AT \$30 IS RAT-IFIED AND DEAL CLOSED.

It is reported from Boston that the United States Mining company is preparing to extend its operations into Mexico. For many months past, it is said, the management has been seeking a property in the southern republic that could be used as a basis for the erection of a smelter in that country. Many properties have been examined and turned down by its engineers, but it is understood that a property has at last been found that will, most likely, fill requirements. Its purchase, according to report, would call for an initial expenditure of \$500,000. What the company is said to want is something that will be to smelting works in that country what the Centennial-Eureka and other properties in Utah are to the smelting works of the company in this valley, and the mammoth property in Shasta county, California, is to the company's works near Kennett.

The United States company stands as an open and avowed competitor of the American Smelting & Refining company in this country, and as the American company has the Maxican mineral-bearing regions largely under its control, it would seem that the United States company has determined to give the trust a run for its money down in the southern country.

While nothing has yet cropped to the erty in the southern republic that could

run for its money down in the southern country.

While nothing has yet cropped to the surface on the subject, there is a well grounded suspicion that one of the purposes of the company in buying the Eureka and Richmond mines at Eureka, Nev., was to better enable it to enter the Nevada field as a direct competitor of the American company, and it will surprise no one in this section to hear that the company has decided to establish smelting works at or in the vicinity of its Eureka mines.

EAGLE & BLUE BELL JUMPS.

Eastern Orders for Stock Advance the Price to \$1.76.

As a result of a flood or orders from New York stock in the Eagle & Blue Bell company sold up to \$1.76 a share yesterday, an advance of 76c from the prevailing price the day before. The Bingham Consolidated company owns the control of the proposition, and an effort was made by prominent brokers here to learn from the Boston end what had caused the demand for the stock. The effort resulted in fallure, but word was received that the stock was much sought after by New York curb brokers.

Assistant General Manager H. H. Green of the Bingham Consolidated was asked during the afternoor what he considered the cause of the movement, and he confessed to being entirely in the dark. Every day's work means just so much of an addition to the already large ore reserves, but nothing in the way of sensational development has been reported from the property for some time

ore reserves, but nothing in the way of sensational development has been reported from the property for some time past.

There seems to be something behind the movement of the stock, which is practically unknown in the eastern markets, where it has so suddenly jumped to the front. It was never listed outside of Salt Lake, and the stock was so closely held when the Bingham company secured control that only three or four stockholders participated in the deal. Others might have done, but they declined on the ground that the mine was worth a great deal more than it was selling for. It is thought possible that a deal of some nature involving the Bingham Consolidated may be incubating and that a larger percentage of the Eagle & Blue Bell shares are being sought to meet conditions. Developments are expected.

Ore and Bullion.

BAMBERGER-DE LAMAR DOINGS.

New Hoist Being Installed in Hog Pen Workings.

The erection of the new holst in the tunnel in the Hog Pen mine is being pushed as rapidly as circumstances will permit, but it will yet be several days before it is completed, which slightly reduces the shipment of ore from that mine to the mill, says the De Lamar Lade.

The mill in running steadily, but just at present is not working quite its usual amount of ore, owing to improvements geing on in the mine.

The new radiotics of "juice," the car trucks and boxes will have to be taken up separately on toboggans drawn by hand. When it snows at Alta it snows right.

Lyon County (Nev.) Times: When the

The new reduction works are now well on the way to completion, but it will be some time before this is accomplished.

PETRO TO UTAH-APEX.

Shareholders of Former Ratify Option and Sales Is Made

WOOD RIVER ZINC MINE.

Nay Aug Property Has Developed Shoot 330 Feet Long.

Griff Thomas, the foreman of the Nay Aug group of mines of the Wood River Zinc company, says that the mine has shipped ore from the first day that the company took hold. In the only drift or tunnel in which work is going on there is ore for 330 feet without a break. As it is only eighty feet to the surface, and the ore feathers toward the grass roots, it is eddently the top on an ore cots, it is evidently the top on an ore

body.
"If they attain a depth of 100 feet lower," Mr. Thomas says, "they may occidental, 14-16 East 1st So.

have a mine worth millions of dollars. They got some cold turkey all right when they got this mine."

Utah Stocks In Boston.

James A. Pollock & Co., bankers and James A. Pollock & Co., bankers and brokers, yesterday received over their private wire from Paine, Webber & Co., one of their Boston correspondents, the record of sales of Utah stocks on the Beston market, with range and closing nuotations:

quotations:

Boston, Dec. 29.—The traders seemed to recover from their fear of tight money and stocks were boomed all through the list. Tamarack and Osceola declared dividends of \$3 and \$4 respectively, and this attracted attention to the lake coppers, which were more active than for many weeks past. Mass, Michigan and Royale all showed good advances, closing near the top. Parrot furnished the greatest activity, rising from 34 to 42. Take profits on any further bulge and stand ready to take back the stocks on any break caused by further tightness of money Quotations:

Ore and Bulllon.

Five cars of ore from Bingham, two rom Tintic and one from Idaho were released from the Taylor & Brunton sampler yesterday morning.

Articles of incorporation of the Copper Crown Mining company, which owns six claims in Beaver county, were filed yesterday. The company is capitalized for \$150.000, divided into shares of a par value of 50 cents each. Harry N. Reinhart is president; George E. Teasdale, vice president; J. M. Bowman, secretary and treasurer.

permit, but it will yet be several days before it is completed, which slightly reduces the shipment of ore from that mine to the mill, says the De Lamar Lode.

Prifts are now being run to tap sevichimneys of ore known to exist in a April Fool ground. There has been or shoot of ore tapped that averages \$30 or more. This ore is being opened up, and will be extracted when desired. The Lode is informed that it is the intention of the company to do considerable work in the near future on several company claims which have been lying idle, for late development work in dicates ore bodies at hand.

The new boilers, increasing the capacity of the power plant, have been put in place, and hereafter there will be no lack of "juice."

The mill in running steadily, but just at present is not work in the road have becomes at Alice it can be a laken up separately on toboggans drawn by hand. When it snows at Alice it can be a laken up separately on toboggans drawn by hand. When it snows at Alice it can be a laken up separately on toboggans drawn by hand. When it snows at Alice it can be a laken up separately on toboggans drawn by hand.

Lyon County (Nev.) Times: When the Ludwig copper mine begins pumping op-erations next summer there will be a erations next summer there will be a chance to sell the company considerable scrap iron. The water in the lower level of the mine is highly impregnated with copper, running as high as thirty-five pounds to the ton. To precipitate the copper in this water scrap iron will be required, and considerable of it. Somebody can make a stake by gathering up the scrap iron around the community now and holding it to sell to the company when it begins to unwater the mine.

At the special stockholders' meeting of the Petro Mining company yesterday the option which the Utah-Apex has held on the property for several months past was ratified and the officers of the company were authorized to deed over all of the company's possessions to the purchasing corporation. The deal involved \$39,000, or at the rate of 15c a share, for the Petro company's stock.

The transfer, a record of which was made during the afternoon, included all of the Atlantic, Andy No. 1 and Adella lode claims, except a portion that was fleeded to H. C. Hazelton, J. C. Dugan, A. Castleman and A. G. Robertson in July, 1834; all of the Petro and all of the Democrat lodes, and all other property of the company, including machinery and equipment, located in the Bingham camp. The group helps to round out the possessions of the Utah-Apex company.

Development work on the Dyer copper property, under bond to the Mason Valley Copper company of Salt Lake, is progressing in a very satisfactory manner and the showing of ore is good, says the Lyon County (Nev.) Times. The character of ore is a black oxlde and shows very good values and indications of permanency. In the Dewey tunnel at a distance of 175 feet a winze is being sunk on a recently encountered vein of ore. tance of 175 feet a winze is being sunk on a recently encountered vein of ore. At this point in the tunnel the depth below the surface is about eighty-five feet. From the showing now made in the property there is every reason to believe that the parties who have the bond will take over the property when their time expires, which will be in about sixty days from the first of the year.

MINING STOCK EXCHANGE.

Eagle & Blue Bell Nearly Doubles Value in a Day.

Value in a Day.

It was Eagle & Blue Bell day on the mining stock exchange yesterday, that stock advancing from \$1 the previous day to \$1.76. On the forenoon regular call there was nothing doing but Eagle & Blue Bell, and the first sales were made at \$1.50. Information early reached mining circles of the sudden jump, and there was much curiosity as to the cause. Beyond the fact that much of the stock was being bought for Boston parties, nothing definite could be learned.

Lower Mammoth was again put through its paces yesterday. It wavered about the 40c mark much of the day. Little Bell was a large seller, the apparent quantity of stock being a factor in letting the price gravitate to \$43.75 and thereabouts. Ajax saw another good day. Several thousand shares were sold, but the demand was not satisfied and the stock closed for the day at 30c.

During the day 38,87 shares of stock with a selling value of \$31,763.45, changed hands.

Following are the final quotations and

Following are the final quotations and record of sales made during the two reg-ular and open calls:

New York, Dec. 29.-For practicable purposes today was the last day of the year on the stock exchange. There are made on Friday carrying over until the following Monday and stocks purchased on Friday are to be paid for on the following Monday. As Monday is the New Year's holiday the settlement for today's transactions in the stock market will be deferred in effect until the turn of the year. This fact was made the basis for the speculative furore which pervaded year. This fact was made the basis for the speculative furore which pervaded the stock market today from start to fin-ish and carried dealings to the two-mil-lion share level. It was argued that prep-arations for the January first settlement must now be completed and the stress in the money market must have done its

As a matter of fact there was less severity in the money stringency today than on the two previous days. The rate

GRAIN AND PROVISIONS.

Chicago, Dec. 29.-The wheat market was strong throughout the entire day. The firmness, however, was more due to light offerings than to any great amount of buying, the volume of trading on the whole being moderate, commission houses and some of the leading shorts were the principal bidders. The selling was chief-ly by longs. The principal bullish factor was a cablegram from Argentina saying that harvest operations were delayed by wet weather. The market closed strong, with prices practically at the highest point of the day. May opened 1/2 to 1/2014 higher at 87@871/2, advanced to 87%, and closed at 87%, a gain of 1/4 over yester-day.

closed at 87%, a gain of ¼ over yesterday.

Lively bidding by shorts caused a sharp bulge in the price of December corn early today. The price of old December was advanced from 50, the opening quotation to 54, with scarcely a trade recorded between these figures. Profit-taking caused a severe setback, the old December closing ¼ up at 50. The May option was little affected by the erraite actions of December, but held firm throughout the day, closing ¼ up at 44%@44½.

The oats market held firm the entire day. May closed ¼ % up at 32½.

Provisions were strong because of an active demand by shorts and local bulls. active demand by shorts and local bulls. At the close May pork was up 15@17\\(\), lard was up 10 and ribs were 7\\(\)2@10 high-
